

Welcome to the world of premium roller chain, engineering class and water treatment chain solutions.

Welcome to MAXCO Chain!

MAXCO Chain is a leading industrial chain manufacturer and chain solution provider serving industries across the globe.

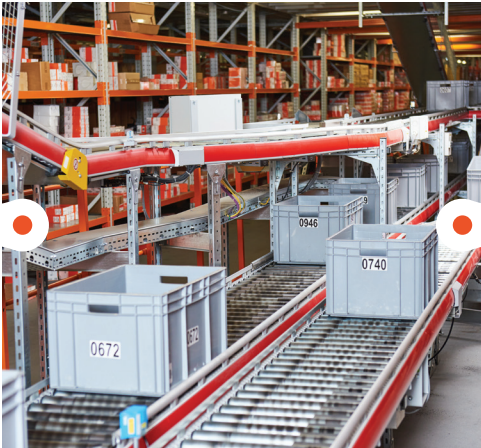

With over a century of chain and power transmission experience, we provide a wide variety of high-performance industrial roller chain and engineering class chain solutions.

Our customers count on us for personalized service and support.

We offer superior product quality and performance at a lower total cost of ownership.

From power transmission to wastewater treatment, MAXCO Chain delivers chain solutions that keep your operations moving efficiently. It's all backed by responsive service and proven technical expertise.

TAKE THE NEXT STEP

Contact MAXCO Chain's sales team to discuss how we can provide the right industrial roller chain and engineering class chain solutions for your needs.

We have three service center locations:

Georgia

1245 Kennestone Circle,
Marietta, GA 30066

Office: (770) 424-9350
Fax: (770) 424-9145

Oregon

13805 SW Industry LN Suite 150
Sherwood, OR 97140

Office: (503) 228-6828
Fax: (503) 228-6703

New Jersey

9 Riverside Dr,
Pine Brook, NJ 07058

Office: (973) 575-7860
Fax: (973) 575-7250

SUPERIOR CHAINS AND VALUE... DELIVERED!

A WORLD OF PREMIUM CHAIN SOLUTIONS

QUALITY HAS A NAME

The MAXCO Chain reputation is built on industrial roller chain expertise and deep product knowledge. Every MAXCO Chain solution is designed for precision, strength and longevity, using premium materials and modern manufacturing processes.

A legacy of industrial chain leadership.

Our company's history in industrial chain manufacturing dates back to 1911, when operations began as Tobata Foundry Co. in Japan. In 1956, the company joined the Hitachi Group, and in 1972, Hitachi Chain Ltd. was established. The business expanded in 1987 with the addition of the Building Solutions division, operating as Hitachi Metals Techno, Ltd.

In 2016, the company separated from the Hitachi Group to become SENQCIA Corporation. Following a change in ownership, the company was renamed MAXCO Chain in 2021, and in May 2023, MAXCO Chain successfully completed its merger with HKK Chain Corporation of America, further strengthening its global capabilities.

A world of high-quality chain solutions.

MAXCO Chain has remained committed to excellence, and we have been driven by innovation, craftsmanship and customer focus. We offer three distinct product lines covering a full range of power transmission and conveyance related applications:

Industrial Roller Chain

Exceeding expectations—our ANSI and British Standard chains are designed to meet and surpass industry standards for conveyors, drives and high-speed systems. They are available in standard, heavy-duty, corrosion-resistant and premium fatigue-rated options.

Engineering Class Chain

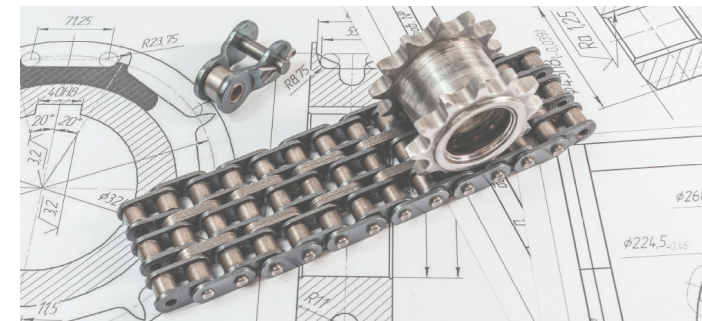

MAXCO Chain offers a full range of engineering class chains for heavy-duty power transmission and conveying applications.

Our offering includes drive chains, roller conveyor chains, cast combination chains, welded steel chains, and mill chains, among others. These are ideal for heavy-duty drive applications, conveying, and bulk material handling and are built for strength, longevity, and easy interchangeability.

Water Treatment Solutions

We offer high-quality chains, flights and critical components engineered for use with all types of wastewater treatment facility equipment.

Our components provided for rectangular clarifiers are trusted by municipalities and water treatment facilities worldwide for their resistance to corrosion, low maintenance requirements and compatibility with standard clarifier designs.

We design and manufacture only the highest quality industrial roller and engineering class chain.

Our customers count on us for premium, made-to-order solutions and highly customized service and support. We offer Tier 1 product quality and performance at a very compelling low cost of ownership.

Engineered for performance, MAXCO Chain provides everything from advanced water treatment solutions to custom roller chain attachments—built to thrive in the toughest conditions.

INDUSTRY SPECIFIC SOLUTIONS

A century of deep vertical industry expertise enables us to deliver reliable solutions tailored to each application.

Every product solution is engineered for precision, strength, and long service life in the most demanding environments.

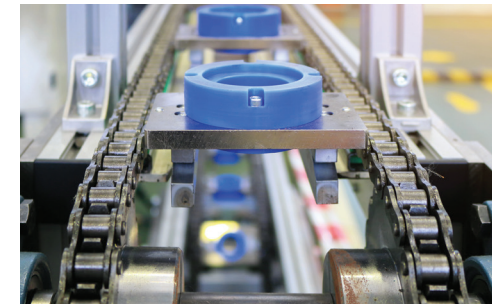

Mining & Aggregate

Conveyors, Crushers, Bucket Elevators, Stacker/Reclaimers

Water Treatment

Clarifiers and Sedimentation Tanks, Bar Screens, Chain Drives

Industrial Manufacturing

Lifting, Conveying, Power Transmission, Packaging

Forestry, Lumber, Pulp & Paper

Log Conveyors, Debarking, Sawmill, Edgers and Trimmers, Sorting, Kiln

Food & Beverage Production & Packaging

Packaging Equipment, Bottling and Filling Lines, Baking, Washing

Material Handling & Conveying

Conveyor Systems, Pallet Handling, Lift Tables, Sorting and Distribution

Agricultural Equipment

Combines, Harvesters, Balers, Spreaders, Conveyors

Heavy Construction

Excavators, Loaders, Pavers, Trenchers

Automotive Manufacturing

Assembly, Overhead Conveyors, Paint, Storage and Buffer Systems

MAXCO Chain is more than just a supplier. We are your industrial chain solutions partner.

- **Experience:** A century of pioneering world class chain solutions.
- **Customization:** Custom chain solutions for an array of industry applications.
- **One-stop shop:** Broad assortment of industrial and environmental chain.
- **High quality:** ISO-certified processes ensure rigorous quality control.
- **Responsiveness:** Streamlined processes delivers custom chain solutions faster.
- **Price/Value:** Premium quality and performance with lower cost of ownership.
